## Streamlined Authority Codes in MIMS

During training sessions, I have been asked “Do you have the streamlined authority codes in MIMS?”

MIMS incorporates not only the streamlined authority codes but also identifies those medicines that are approved for Nurse Practitioner Prescribing. This information can be found in the Abbreviated Product Information wherever it features in our products. These include MIMS Online, eMIMS, iMIMS, MIMS Mobile and the MIMS Abbreviated book.

To show you how to find these codes we will use MIMS Online to point you in the right direction.
