

Renewing your subscription for iMIMS (iPhone, iPad & iPod Touch) for staff members of Queensland Health, NSW Health, ACT Health, Victoria Health & Tasmania Health (DHHS).

iMIMS provides access to the full range of MIMS medicines information in a simple app that can be used on any iPhone, iPad or iPod Touch. iMIMS provides convenient access to MIMS data no matter where the user is. With updates available each month, iMIMS is a valuable, up-to-date, portable, local, electronic reference product. It provides the complete range of full and abbreviated medicines information and the drug/drug interaction module as well as the pill identifier module with almost 3000 pill images.

Many state health departments and private hospital groups provide iMIMS to their staff to use with their own Apple device. These groups offer iMIMS as part of the enterprise “bring your own device” concept that allows clinicians and other staff members to access essential clinical information on their personal mobile devices. As a staff member, you do not have to pay a subscription when downloading and registering for iMIMS. Your usage of the App is covered by an enterprise agreement between MIMS and your employer.

The process of registering for the enterprise access to iMIMS varies slightly from state to state, but what is common to all is that you need to be a valid authenticated user of your state clinical information portal:

QLD <https://www.ckn.org.au/>

NSW <http://CIAP.health.nsw.gov.au>

VIC <http://www.health.vic.gov.au/clinicians/>

ACT <http://tch.anu.edu.au/>

TAS <http://epoch.hcn.com.au/login>

One of the most common questions we are asked here at MIMS is how to renew an annual enterprise subscription. Each year (the actual date varies depending on which state you are employed in) you will be required to renew the iMIMS subscription.

You will receive a series of notifications to remind you of the need to reregister.

- 30 days out from the expiry date.
- 5 days out from the expiry date.
- On the day of expiry.

The process is simple! Return to your state health department’s clinical portal and follow the same validation process you did to originally activate iMIMS.

Your registration allows you to use iMIMS on up to three Apple devices, e.g. you may have an iPhone, iPad and iPad Mini; your enterprise subscription can be used on each of them. You can also transfer your subscription to a new Apple device if you upgrade to a new model. To manage your

enterprise subscription and delete a licence for an unwanted device, visit the iMIMS Subscription Management Portal.

- www.mims.com.au/iphone
- Select the Enterprise User Login Option
- Login to your account status using the enterprise subscription token you were provided with at signup registration.
- You will be presented with a list of devices against your account.
- To deactivate an unwanted device, please click on “Deactivate”.
