

New Products - Istodax

Istodax (**romidepsin**) is an anti-neoplastic agent that belongs to the class of drugs known as histone deacetylase (HDAC) inhibitors. Romidepsin has been shown to have pleiotropic activity including HDAC inhibition, induction or repression of gene expression, cell cycle arrest, cell differentiation, cell growth inhibition, and induction of apoptosis. Istodax is indicated for the treatment of peripheral T-cell lymphoma in patients who have received at least one prior systemic therapy. Istodax is available as a powder for concentrate for solution for infusion with solvent in a single use vial in packs of 1's.
