

eMIMS gets a makeover and looks and feels 20 years younger – meet eMIMSDesktop

You may be aware MIMS has launched a new version of eMIMS. Available as both an Internet based and desktop version, eMIMS is designed to support your workflow.

Unlike any other medicines information resource in Australia, eMIMS has an extensive range of content. Alongside the medicines information you will find evidence based drug interactions, patient care and clinical resources as well as the most refined image search capabilities; all put together in a way that will encourage engagement with patients and support work flow.

We think you may discover new depths to the medicines knowledge in new eMIMS simply because it will be easier and faster to find. We urge first-time browsers to follow their fingers and discover. As well as information that was always there, eMIMS' improved pill identification and optional IMgateway drug/herb/food interactions module are the first of many content innovations.

We promise, some things stay the same and we thank the very many of you who've accepted the integrity of eMIMS for a decade and more. That's one thing that hasn't changed. As we've honed our software to give easy access to essential information, there can be no short cuts in authenticating that information. We are proud that in the 50 years since the "Monthly Index of Medical Specialties" was first published, our editorial system of checks and balances has earned a reputation for independence, accuracy and currency second to none.

MIMS understands that not all our customers are ready for or able to access medicine information via the internet and that installing the software onto your hard drive remains your preference. In order to ensure you can continue to use eMIMS in your preferred manner we have provided two options – the choice is yours.

M eMIMSDesktop – download from DVD to sit on your hard drive.

You will be supplied with a DVD to install eMIMSDesktop on to the hard drive of your computer. Once installed, you will be required to enter your license key and activate your copy. eMIMSDesktop content is updated each month and we will send you an email each month to tell you when and how to access these updates. We strongly recommend you update immediately when you receive this notification as the MIMS editorial team can make over a hundred changes each month. The PBS and the TGA Safety Bulletins are also updated when you download each month.

M eMIMSCloud – internet sourced from wherever you are; for PC, MAC or Android and on desktop, laptop or tablet so you can key, click or touch.

eMIMSCloud content is updated seamlessly each month so there is nothing for you to do and you can be confident your eMIMSCloud is current with the PIs and CMI's, together with the PBS and the TGA Safety Bulletins updated each month. If you intend to use a Mac for eMIMSDesktop you can do so if you have Windows for MAC loaded on your device. If not, you will need to use eMIMSCloud
