

New Products - Striverdi Respimat

Striverdi Respimat (**olodaterol (as hydrochloride)**) is a long-acting beta₂-adrenergic agonist. Olodaterol has the preclinical profile of a long-acting selective beta₂-adrenoceptor agonist (LABA) with a fast onset of action and duration of action of at least 24 hours. Striverdi Respimat is indicated for once daily maintenance bronchodilator treatment of airflow obstruction in patients with chronic obstructive pulmonary disease (COPD). Striverdi Respimat is available as a metered dose soft mist inhaler (olodaterol 2.5 microgram/dose) containing 60 actuations.

This list is a summary of only some of the changes that have occurred over the last month. Before prescribing, always refer to the full product information.
